

ROLE PROFILE

Contact : secretariat@fapics.org qui vous mettra en relation directe avec GKN Driveline

Role Title: Regional Supply Chain Director
Function: Supply Chain
Sub Function: Management

Role Purpose:

- To deliver the Divisional Supply Chain strategy within the region. (Functionally responsible for supporting and mentoring Plant and Regional Supply Chain Managers in developing excellent people, processes and partnerships).
- The primary objective is to optimize Material, Information and Cash Flow in line with industry best practice and the global Supply Chain Strategy and Tools.
- Maximize Customer Service (both DSA & Logistics Quality) at the total lowest logistics costs with full asset utilization. Participate at Global level to the Supply Chain strategy elaboration, to the processes and tools definition and specific Supply Chain projects.

Key Responsibilities:

Supply Chain Development and Execution

- Contribute to the development of the global SCM Strategy, SCM Excellence Model and CI Plan through participation with the Divisional team
- Deploy Global SCM strategy and objectives through regional action plan to achieve targeted improvements and savings
- Develop the regional strategy for Supply Chain management, targeting the appropriate service and performance levels to meet business objectives
- Assess and manage the Supply Chain risks through SIOP and EVS controls with appropriate actions and escalation when required

Organizational Development and Leadership

- Provide functional and technical support to countries / plants / SCM Managers as required
- Support professional development of the SCM function in line with Divisional framework
- Develop internal and external partnerships to ensure all relevant stakeholders are aligned with SCM strategy and deployment model
- Lead the interaction and relationship with external Logistics / transport partners.

Supply Chain Systems & Processes

ROLE PROFILE

- Lead and participate actively in tactical SCM activities to ensure effectiveness of both process and outcomes (Eg through coordination of SIOP, MPS, Master Data Mgmt, MRP...)
- Develop and utilize appropriate SCM and Business Intelligence tools to drive process compliance and highlight exceptions
- Ensure the accuracy of information and material flow across the extended value stream

Continuous Improvement

- Lead and execute a Continuous Improvement plan aligned to Divisional and Regional strategy
- Lead and coordinate key SCM programmes and projects
- Utilise effective measurements and reporting of SCM processes and outcomes in order to highlight performance and drive improvement
- Support collaboration and Best practice sharing with other areas of the business in order to maintain perspective and further improve SCM processes
